

USKG Civil War Protocol

USKG Protocol #001

9/16/2026

Should civil war break out, USKG needs to take several steps.

1: Mobilize

USKG must arm its enforcers and loyal militia forces to prepare for war. All enemy council members or other government people are temporarily put on suspension. All that are in the revolting tribe(s) but stay loyal must turn in their USKG armor and weapons. They cannot go fight but may use non-USKG loadouts or Weaker USKG loadouts to Defend USKG sites and members. All elections and major events are suspended.

2: Gather Intel

Logs and records will be scoured for enemy site locations. Data on the war readiness and diplomatic relations of the rebels will be taken. Data on their resources, manpower, will, and internal struggles will be recorded. There are two rebellion scenarios: A and B. A can be rejoined with USKG with grumble. In scenario B, the rebels cannot be rejoined at all, and will be crippled, then let go. Small Skirmishes and battles will likely be fought at this stage. Disloyal enforcers will be relieved of their roles. Once all the targets are identified, Step 3 Will be executed.

3: Combat

With the targets acquired and enemies defined, then troops can launch coordinated strikes on enemy sites. The loyal tribes will raise militia forces, operating as independent units to achieve the same goal. But these militias do need to listen to the USKG government and enforcers. Militia are volunteers and will not be provided with USKG gear.

Suggested Weapons:

-Destroyer

-ABY-3A

- RAIDR-0
- Atomizer
- Fortune Breaker
- AISR
- Other Heavy enhanced Weapons dealing at least 100 damage per shot (rapid fire), or 500 damage (Slower fire).

Suggested Armor:

- Infinity
- Tethys MK1
- STL-0 (USKG)
- Eternal (not much it can do though)
- Obsidian
- TAS
- Magma
- Other Enhanced Armor with protection above 15.

Once the rebels are defeated and/or expelled, things may return to normal. If the war cannot be ended by bloodshed, then use of World Builder Cutting on protected enemy sites may be used. However, this may only be used in scenario B.
